

PROMPT TYPES

1. **Instructional prompts** provide clear and specific instructions for the AI model to follow.
 - Example: "Write a brief summary of the effect of global warming on health care."
2. **Descriptive prompts** provide a description or context for AI to generate content based on.
 - Example: "Briefly describe the steps required for addressing the effect of global warming on health care."
3. **Question prompts** provide questions for AI to answer.
 - Example: "What are the effects of global warming on health care?"
4. **Completion prompts** provide a partial question for AI to complete.
 - Example: "The effect of global warming on health care can be addressed by the following steps..."
5. **Example-based prompts** provide an example for the type of output desired.
 - Example: "One example of preventing effects of global warming on health care is to 'Monitor emerging and re-emerging diseases that may be influenced by changing climate conditions.' Provide more example on these grounds to reduce the effect of global warming on health care."
